# LONG TERM PAVEMENT PERFORMANCE PROGRAM DIRECTIVE

*For the Technical Direction of the LTPP Program*

Program Area: IMS

Directive Number: I-161

Date: February 7, 2013

Supersedes: I-159

Subject: 2013 Public Data Extraction

---

On July 2, 2013, the Public Data Extraction (PDE) will be performed from the Information Management System Production instance (IMSPROD) on the LTPP Data Entry Portal (LDEP). By 12 P.M. Pacific time on July 2, 2013, the Regional Support Contractors shall have completed the following:

- Entry of each portion of multi-part data sets
- Changes in response to data checks reported at least 30 days prior to the PDE date
- Computation of annual traffic estimates for sites in the SPS WIM Traffic Pooled Fund study
- Running of Quality Control (QC) programs and complete QC processing on all data in the production instance
- Update of EXPERIMENT\_SECTION with known construction events
- Removal of pavement monitoring and construction data after the effective date of a test section status change to "out-of-study"

The Technical Support Services Contractor (TSSC) will turn off access to the LDEP IMSPROD during the PDE. While it is anticipated that IMSPROD will be reopened as soon as possible, for planning purposes the Regional Support Contractors should anticipate that it will not be re-opened until after July 7, 2013. The TSSC will send out an announcement to the LTPP team when IMSPROD is re-opened.
